## COMPLIANCE WITH LEGISLATION

- The declarant confirms that the listed products have been manufactured using only
  18% STAINLESS STEEL
  which has been authorised under
  Regulation (EC) N° 1935/2004.

- The declarant confirms that the components of the materials are inert inasmuch as they do not migrate into food in levels that represent a risk to human health, that cause an unacceptable change in the composition of food or that cause a deterioration in the organoleptic characteristics of food.

- The declarant confirms that the materials do not contain substances subject to restrictions under
  Regulation (EC) N° 1935/2004.

or

- The materials contain the following substances subject to restrictions under
  Regulation (EC) N° 1935/2004.

NOT APPLICABLE

| Chemical name | MCA No | Reference No | CAS No | Legislation/Recommendation | Restriction |
|---|---|---|---|---|---|
| | | | | | |

- The declarant confirms that the materials comply with requirements relating to changes to the organoleptic properties of food under Regulation (EC) N° 1935/2004.

- The declarant confirms that the materials are traceable and can be followed through the different stages of manufacture, processing and distribution.

- The declarant confirms that when placed on the market the materials are appropriately labelled in accordance with Article 15 Regulation (EC) N° 1935/2004.

- The declarant confirms the implementation of processes required to ensure good manu facturing practice such as the implementation of a quality control system and due mana gement of appropriate documentation in accordance with Regulation (EC) N° 2023/2006.

CERTIFICATE No 70.431.22.15169.01R1 – Laboratory: TUV SUD Certification and Testing Co. LTD.

| Test item | Test method | Judgement criterion | Conclusion |
|---|---|---|---|
| Chemical composition analysis | OES | ASTM A 240/A 240M-20a type 430 | Pass |

**Test Result(s):**

1. **Chemical Composition Analysis**
   Test with reference to Spark discharge atomic emission spectrometric method (Routine method)

Environment condition : Temperature 25°C, Humidity 46%RH

Test equipment : Number Metal-001, Model MAXx LMM16

Test method : OES

Test result(s) :
